

# Hardie - 9/15/2026

Greetings to all and God Bless,

We are continuing to press forward and we are making a lot of new friendships along the way. We are working hand in hand currently with Social Welfare and the hospital and we have been now alerted to five babies that need your prayers and support. We currently gave four tins today for a baby who lost her mom a month ago. The overall cost for the five babies is \$50.00 a month per baby. FIVE babies = \$250.00 a month. Baby Ruth is one year, and two months old. We are finished giving formula but after having medical review we are providing Lord willing 200 kwacha (\$10.35) per week, buying protein, eggs, beans, fish, ground nuts etc...

Today we were called to the hospital to help three women with medical needs after C-section problems. Their wounds are not healing up properly we were asked for purchasing gauze rolls at 250 kwacha a roll which last two to three days, honey for wounds, hydrogen peroxide, an ointment. There is no funds for these three who are currently nursing their babies. Only getting rice for breakfast and cornmeal for lunch. We gave some ground beef 75 kwacha worth today for their breakfast tomorrow. Hoping to help the healing process. Everyone in the maternity ward is only fed rice for breakfast and cornmeal for lunch, so tonight we bought peanuts for all the patients. ( Their is no way to cook food on the premises in the evening as the cooks go home.) Their are no visitors allowed no family, no husbands in the maternity ward, but they brought me in (Sarah) and gave me a tour and even showed me the Premie room. I asked if I could give the Gospel in the ward and one gave me permission to come in and share the Gospel. Some of the nurses are not as comfortable, so I am free to come depending on who is working the shift.

We appreciate your prayers and assistance as the Lord leads, currently using our own funds that are normally for our own living expenses as we walk by faith for the Lord's provision through those that are his. Please consider others who might be interested we could possibly set up times to link with those you support through facetime, email, WhatsApp, pictures , letters, etc... Today we found out Senanga maternity ward is a catchment hospital for clinics and outpost as far away as 3+ hours, according to the map, more like 9-14 hours according to all the taxis. I thought the baby ward was full, they even had mattresses in the linen closet, but I was told the ward was almost empty, compared to normal.

So we currently have five babies who need formula, 3 mothers who need food assistance so their wounds can heal. And a whole ward that needs an evening meal.

Two families who need food assistance one which Lord willing we will meet for the first time tomorrow. Social Welfare said if they take us to meet the family it will draw a larger crowd for us to give the Gospel to than if we went to see the family on our own.

Three of the families we are currently assisting by faith with formula.

Thanks and God Bless
